# WHEN THE CLIMATE CRISIS CLAIMS YOUR HOME

## – Art Competition –

*Why is it so difficult for us to be brave?  
To say something when everybody else is silent.  
To act when everyone is sitting and waiting.  
Waiting for something to happen.  
What is happening?*

According to IDMC in 2019 nearly 1,900 environmental disasters forced some 25 million people across 140 countries to leave their homes and numbers are rising. This has far-reaching social consequences, for which solutions must urgently be found. So, let us be brave together. Let us get active now! Take part in our art competition, with no limits to your creativity and form of expression!

### Participants' profile

*Much happens. About some things you may hear before it is forgotten again. It happens all the time. Everyone talks about it. Nobody wants to start. Everyone knows. It affects us too. Not today. Not tomorrow. Then, when we have looked the other way too long. Then, when it will be too late. Being brave is easy. **Being brave is to act.***
